SUMMARY

Senior Frontend Engineer with 6+ years building responsive, high-performance web applications for international clients and distributed teams. Deep expertise in React.js, Vue.js, Next.js, Nuxt.js, and TypeScript, with strong command of clean, maintainable code and modern UX/UI practices. Experienced leading frontend architecture, mentoring engineers, and collaborating asynchronously across time zones to ship scalable, user-focused products. Fluent English communicator focused on delivering measurable business and user impact.

CORE SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SCSS

Frameworks & Libraries: React.js, Next.js, Vue.js, Nuxt.js

Backend: Node.js, Express.js, NestJS, MongoDB

Tooling & Practices: Webpack, Babel, Git, Responsive Design, Accessibility, Performance Optimization, UI/UX, Code Review, Mentoring

Also familiar with: Python, basic AI/ML and Data Science exposure

EXPERIENCE

Senior Software Engineer — Frontend Lead

07/2022 – Present

PureLogics

- Promoted from Software Engineer to Senior Software Engineer, leading frontend development across 3+ scalable web applications for international clients.
- Architected and shipped responsive interfaces using React.js and Vue.js, improving Lighthouse performance scores by 25% and reducing page load times by 30% through code splitting, lazy loading, and reusable component architecture.
- Mentored a team of 10+ engineers through code reviews, frontend best practices, and coding standards, reducing review turnaround time by 30% and improving overall code quality and delivery consistency.
- Drove architectural and technical decisions across TypeScript, Node.js, Express.js, and MongoDB, aligning solutions with business objectives.
- Collaborated asynchronously with cross-functional, distributed teams to deliver features on schedule.

Software Engineer

02/2022 – 07/2022

TechOrix

- Built responsive, high-performance web applications in React.js and Next.js, delivering consistent experiences across devices.
- Implemented accessible, multilingual interfaces with strong attention to UI/UX and performance optimization.
- Partnered with cross-functional teams to ship goal-aligned frontend solutions and adopt modern workflows.

Freelance Frontend Developer

10/2021 – 01/2022

Upwork

- Delivered frontend development for international clients, building responsive interfaces to high code-quality standards.
number of projects: 20

Associate Software Engineer

07/2020 – 09/2021

LogicsDrive

- Developed visually polished, responsive user interfaces with React.js, Vue.js, jQuery, and SCSS, maintaining high code-quality standards.
- Stayed current with industry trends and techniques to consistently improve delivery quality.

Associate Software Engineer

02/2020 – 07/2020

TetraLogicx

- Built responsive, scalable interfaces with JavaScript, jQuery, and Liquid that integrated cleanly with backend systems.

Intern — Web Development

09/2019 – 02/2020

- Contributed to website development and company-profile management, strengthening core web development and communication skills.

SELECTED PROJECTS

- **Sliced Health** — Led frontend development for healthcare dashboards and analytics workflows, building responsive, scalable interfaces with React.js, TypeScript, React Query, and Material UI; improved frontend performance by 25% and streamlined complex data workflows for 20+ team members.
- **SES-DLC Website & Web App** — Developed and maintained full-stack web applications, delivering responsive user interfaces, API integrations, authentication, and reusable components using React.js, Vue.js, Node.js, Express.js, TypeScript, and MongoDB; reduced development time by 30% through reusable architecture and shared components.
- **Melbourne City Limo** — Built a full-stack booking web application with responsive booking flows, form validation, API integrations, and mobile-friendly interfaces using React.js, Node.js, Express.js, MongoDB, and REST APIs; improved booking workflow efficiency and delivered a scalable platform for customer reservations.
- **Open Source** — Developed reusable React.js and Vue.js boilerplates for rapid project scaffolding, incorporating TypeScript, Vite, ESLint, routing, state management, and modern frontend architecture; reduced initial project setup time by approximately 40%.

CERTIFICATIONS

- JavaScript — 2023
- Problem Solving — 2023
- JavaScript (Intermediate) — 2023

EDUCATION

BS, Computer Science

Virtual University of Pakistan

2018 – 2022

LANGUAGES

Urdu (Native) | English (Fluent)
